

CommuteAir, LLC Long Tarmac Delay Plan

We are dedicated to providing a level of service to our customers that makes us a leader in the airline industry and are committed to operating a reliable schedule. Safety considerations, weather, Air Traffic Control, operations and other factors may occasionally cause long tarmac delays. In compliance with U.S. Department of Transportation (DOT) regulations, we have planned and prepared to manage and minimize lengthy tarmac delays on our flights. Our goal is to make every flight a safe and pleasant experience for our customers.

Consistent with DOT regulations, CommuteAir's Long Tarmac Delay Plan covers all scheduled and public charter flights that we operate.

CommuteAir's Assurances to Customers:

1. For domestic U.S. flights covered by this Plan, CommuteAir will not permit an aircraft to remain on the tarmac for more than three hours before allowing passengers to deplane unless:
 - a. The Pilot-In-Command determines there is a safety-related or security-related reason (e.g., weather or a directive from an appropriate government agency) that the aircraft cannot leave its position on the tarmac to deplane passengers; OR
 - b. The Pilot-In-Command determines that deplaning passengers at a suitable disembarkation point would jeopardize passenger safety or security; OR
 - c. Air Traffic Control advises the Pilot-In-Command that returning to the gate or suitable disembarkation point in order to deplane passengers would significantly disrupt airport operations. OR
 - d. In the case of a departing flight only, the aircraft begins to return to a suitable disembarkation point within three hours after the main aircraft door is closed in order to deplane passengers.
2. For international flights covered by this Plan that depart from or arrive at a U.S. airport, CommuteAir will not permit an aircraft to remain on the tarmac at a U.S. airport for more than four hours before allowing passengers to deplane unless:
 - a. The Pilot-In-Command determines there is a safety-related or security-related reason (e.g., weather or a directive from an appropriate government agency) that the aircraft cannot leave its position on the tarmac to deplane passengers; OR
 - b. The Pilot-In-Command determines that deplaning passengers at a suitable disembarkation point would jeopardize passenger safety or security; OR
 - c. Air Traffic Control advises the Pilot-In-Command that returning to the gate or suitable disembarkation point in order to deplane passengers would significantly disrupt airport operations; OR

- d. In the case of a departing flight only, the aircraft begins to return to a suitable disembarkation point within four hours after the main aircraft door is closed in order to deplane passengers.
3. For all flights covered by this Plan, CommuteAir will provide adequate food and drinking water no later than two hours after the start of the tarmac delay unless the Pilot-In-Command determines that safety or security considerations preclude such service. A tarmac delay starts when an aircraft is on the ground with passengers and the passengers have no opportunity to deplane.
4. For all flights covered by this Plan, CommuteAir will ensure that operable lavatory facilities will remain available while the aircraft remains on the tarmac.
5. For all flights covered by this Plan, CommuteAir will maintain comfortable cabin temperatures, and ensure adequate medical attention, if needed, while the aircraft remains on the tarmac.
6. For all flights covered by this Plan, CommuteAir, LLC will ensure that passengers on the delayed flight receive notification regarding the status of the delay 30 minutes after the aircraft is delayed, including the reasons for the tarmac delay, if known. Thereafter, CommuteAir, LLC may provide subsequent updates, including flight status changes, as CommuteAir, LLC deems appropriate.
7. For departing flights and diversions covered by this Plan, each time the opportunity to deplane exists at a suitable disembarkation point, CommuteAir will timely notify passengers on the delayed flight that passengers have the opportunity to deplane.
8. CommuteAir has sufficient resources to implement this Plan.
9. CommuteAir has coordinated this Plan with airport authorities (including terminal facility operators where applicable) at each U.S. airport that we serve. Additionally, CommuteAir has coordinated this plan with our regular U.S. diversion airports. For operations that we conduct as a United Express carrier, we have coordinated this through our partner, United Airlines.
10. CommuteAir has coordinated this Plan with the airport authorities and the U.S. Customs and Border Protection (CBP) at each airport that we regularly use for international flights, including diversion airports, and with the airport authorities and the Transportation Security Administration (TSA) at each U.S. airport that we serve, including regular U.S. diversion airports. For operations that we conduct as a United Express carrier, we have coordinated this through our partner, United Airlines.
11. In the event of an emergency, CommuteAir will make every effort to share facilities and make gates available at the airports covered in this plan.
